A Disinfection System for Vehicles & Equipment during Animal & Plant Disease Outbreaks

## Applications

- Agriculture – Infection Control
- Vehicle disinfection
  - Disinfection Bath
  - Spray Bay
- Vehicle wash down
- Suitable for HGV's and tractors

## Benefits

- Versatile and reusable
- Robust and durable
- Low life time cost
- Compact storage
- Corrosion resistant – easy to clean
- Assembly and repackaging in less than 4 minutes
- Manufactured to the highest quality
- Easy and convenient to transport and store
- Containment of disinfectant
- No training required
- Innovative design

Supplied in an EzeeBOX™

## Specifications

Size	<ul style="list-style-type: none"> <li>• 6.5 x 4.0m</li> <li>• Bespoke sizes can be manufactured</li> </ul>
Colour	Black with orange pockets & Grey tram lines
Volume	Up to 75mm depth of disinfectant
Chemical Resistance	Suitable for use with most chemicals. Chemical resistance chart available on request.
Weight	Bund = 37kg – Handles Provided Protective Matting = 26kg Speed Ramps = 12.5kg each

Manufactured to ISO 9001 2008 Quality standard from a composite of (900gsm) rip stop acrylic and vinyl coated polyester fabric and 3mm protective matting. Aluminium wall supports.

Suitable for DEFRA Approved Disinfectants.

Registered Design No: 6008776

WINNING FASTANKS, PORTABLE CONTAINMENT  
TRUSTED WORLDWIDE**

### Composite Enclosure

- The Bund enclosure is an impermeable composite design using rip stop 900gsm coated fabric and a protective reinforcement layer.
- This is more beneficial than absorbent mats as disinfectant is contained and 100% coverage is achieved.

- Reinforcement layer provides protection to the fabric and grip for vehicle wheels.
- High frequency welded in place.

### EzeeBOX

- For storage of enclosure and matting while not in use.
- Packaged Weight = 92kg
- A water proof robust box
- Convenient handling, transport & storage.

### Aluminium Alignment Frame (Optional)

- Designed to align the ramp pieces for temporary installation or on open surface roads or tracks.
- Holding down bolts are supplied as standard for permanent installation on asphalt or concrete.

### 75mm Speed Ramp System

- The ramps are installed on a level surface and the bund is laid out on top and secured.
- Fluid retention at ends.
- Speed reduction for effective disinfection.
- A protective rubber mat is placed between ramps and enclosure.

### Tram lines

- Grey tram lines provide guidance for drivers

### Overflow Kit (Optional)

- Offers controlled overflow & emptying of bund.
- Valve outlet for flow regulation.
- Corrosion resistant.

**FASTANK will manufacture Bund sizes to meet customer requirements.**
